Weather

There is a popular saying that says “**in the Azores we can experience the four seasons of the year in just one day**”. And sometimes that is true! Because we are oceanic islands, the climate of the Azores is very mild being influenced by its distance from the continents and by the passing Gulf Stream.

Because of the marine influence, temperatures remain mild year-round. Daytime temperatures normally fluctuate between 16 and 25 °C (61 and 77 °F) depending on the season. It is also generally wet and sometimes cloudy.
